US HOURLY PAYOUT AI RATING PROJECT

Mathematics AI Rating Project

Online Math Expert : Shape the Future of AI

Become a pivotal force in advancing artificial intelligence by harnessing your math expertise. We seek talented individuals to contribute to the development of cutting-edge AI models through creating and solving complex mathematical

Exceptional written and verbal communication skills.
Meticulous attention to detail and a keen eye for accuracy.

Mathematics AI Rating Project

Online Math Expert : Shape the Future of ideal
Candidate: Demonstrated proficiency in Calculus,
Algebra, Geometry, Statistics, Probability, or related
fields

Undergraduate or postgraduate degree in
mathematics or a quantitative discipline preferred.

Mathematics AI Rating Project

Online Math Expert Shape the Future of AI

Your Role: Problem Architect: Design and construct intricate mathematical challenges to enhance AI learning.

AI Evaluator: Assess the accuracy and relevance of AI-generated solutions. **Knowledge Refiner:** Employ your deep mathematical understanding to refine AI models.

Mathematics AI Rating Project

Online Math Expert Shape the Future of AI Remote Flexibility: Work from anywhere in the United States, Canada, Puerto Rico, Mexico, United Kingdom, Australia, New Zealand, or Argentina. Choose Your Hours: Enjoy the freedom of a flexible schedule.

Competitive Compensation: Earn based on your expertise and project contributions.

Skill Enhancement: Gain valuable experience in the burgeoning field of AI.

Mathematics AI Rating Project

Online Math Expert Shape the Future of AI

Competitive Compensation: Earn based on your expertise and project contributions. Skill Enhancement: Gain valuable experience in the burgeoning field of AI.

Important Notes: This is a freelance, 1099 contractor position.

No visa sponsorship is offered. Compensation rates may vary based on location and expertise. Basic AI training will be provided.

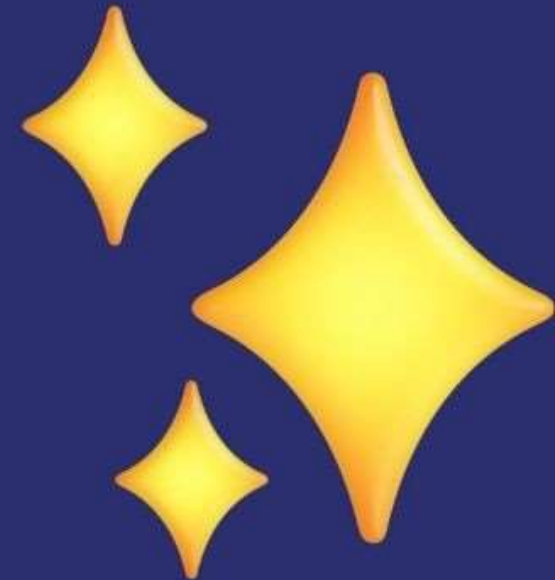

Join us in this exciting opportunity to revolutionize the world of AI through the power of mathematics. Apply Now

AI Rating Projects

Subjects: Coding, Mathematics, Physics, Chemistry, Python

Payouts Available for English and Native Languages:

**\$4.50, \$15, \$25, \$30, \$35, \$40, \$50, \$60
Per Hour Per Candidate**

Rating Project for AI Training

Start

First, Generative AI Basics

Artificial Intelligence (AI) is the branch of computer science that focuses on creating systems capable of tasks that normally require human intelligence, such as learning, reasoning, and problem-solving.

Generative AI is a specialized subset of AI. It is designed to generate new, original content—text, images, video, music—by learning from large datasets and producing creations similar to what a human might make.

Prompt is input text given to a large language model to guide its response or action.

Response is the output produced by a large language model in reaction to a given prompt.

Task is a unit of work on our platform, which provides a single datapoint for a large language model to learn from.

Contributor is your role on the platform - to represent your contributions to model advancement & training.

Queue Manager is our direct point of contact that answers your project specific questions & helps you with your tasking.

Turn is a single exchange between a user and the model, typically consisting of a prompt from the user and a response from the model.

US Non Voice Project

Run in the KNNM i

What are we trying to do?

AI models are still learning and they can often "hallucinate" (make up information that isn't true), misunderstand or ignore specific directions, or generate nonsensical responses that a human would easily catch.

This is because the models are training on publicly available information, and white humans may know not to trust everything we read on the internet, models do not.

It's our job to help train models to make them *helpful, accurate, clear,*

Real situations where AI gets it wrong...

AI chatbots got questions about the 2024 election wrong 27% of the time, study finds

AI language models sometimes gave incorrect information about election and voting laws.

Search Result: *cheese not sticking to pizza*
AI Overview: Cheese can slide off pizza for a number of reasons, including too much sauce, too much cheese, or thickened sauce. Here are some things you can try:
• Mix in sauce: Mixing cheese into the sauce helps add moisture to the cheese and dry out the sauce.
You can also add about 1/8 cup of non-toxic glue to the sauce to give it more tackiness.
• Let the pizza cool: The cheese will settle and bond

Tweet: Bobby Allyn (@bobbyalyn) · 5/19/24
I'm learning a lot about American history with Google's AI Overview
AI Overview: The United States has had 42 presidents, and 17 of them have been white. George Washington is the only president who never lived in the White House, even though he oversaw its construction. John Adams and his wife Abigail were the first residents of the White House, moving in in 1800 when it was almost finished.

How You Can Support

US AI Training

Know The Project

What will you be doing?

- We need your human insights to improve AI model responses.

- You will be doing this in several ways:

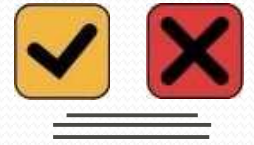

1. Prompt Writing: writing chat-style questions ('prompts') for the model to practice
2. Response Writing/Rewriting: Writing or re-writing model responses to better answer prompts
3. Model Rating (Ranking): Comparing model responses to select the better versions for an AI model

How can you help?

*)

Dur goal is to help **create models** that are **rte@NI, accuræe, ctear, and safe**

Goal	HOW	Why
eyrut	Check for Information Following	Models may not understand the intent or context behind a prompt that a human would have better insight into
Accurate	Check for Accuracy	Models may hallucinate and may not provide the right information
Clear	Check for Writing Style	As a user, you want an answer that is succinct, direct, and easy to understand (think engaging / almost NY Post article style)
Safe	Check for Harmlessness	We need to make sure that models are not disseminating harmful information (i.e. not to tell us to put glue in our pizza!)

Task Flow Overview

Typical projects will include parts or a combination of all of these types of actions

Prompt

You'll be asked to write a prompt (question) to the model

Response

You'll be asked to write a response, emulating a GOOD AI model, to a specific prompt

Rating

You'll be asked to rate the quality of a model response to a prompt.

Response Rewrite

You'll be asked to re-write a model's response to a prompt

Single Turn: You only need to write one prompt + one response

Single vs Multi Turn

Multi Turn: You will need to have a *conversation* with the model, with multiple prompts & responses that build off the initial prompt

B Important Project Resources

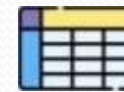

Resources Available to you while on a project:

Discord Community:
Community of other contributors + QMs for questions

Instructions:
Your continuously updated guide that's available while tasking

Rubric:
Outlines exactly how to analyze and either rate a model or write a response

* Check your chats/channels consistently, you might be added to various chats

! Always have this open next to you when tasking, guidelines for tasks can be a constant

Rubrics are KEY to follow to train the model for specific requirements & can be found within the instructions

Working on our platform

11eAojec

Know

To access our platform, you will need:

- Laptops desktop
- Stable internet

You cannot use...

- **VPNs:** These will

we will not be able to complete any tasks

onboarding. you will be by

availability & your pay rate, it may take up to 2 weeks to staff

Each project can last from a few weeks up to several months.

You are able to work on tasks any time

hours per week**

**More hours worked per week can lead to a higher tier

Yes note: Hourly rate for tasks on the prop

Training Rate: Hourly

project onboarding - typically lower than base rate

tracked automatically***

***Some

Use the 'Need Help?' feature in the onboarding dashboard

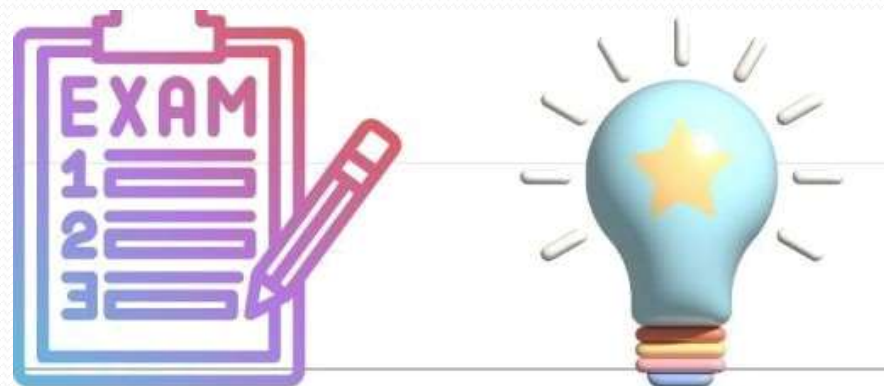

Project Specific: Reach out to your project QM!

****The "Need Help?" feature may take 5-7 business days

@ Test Your Knowledge! Check #1

What is your role at Select all that apply!

To help train models to be helpful, accurate, clear, and safe by bringing my human insights

To make sure that models follow instructions from prompts

To write AI code and algorithms

To make sure AI models have clear and engaging writing styles

Correct!

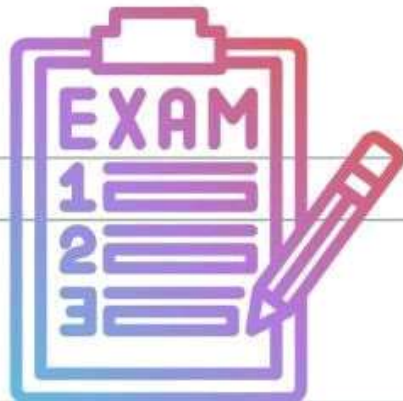

Correct! You will be at the forefront of model training by ensuring models are helpful, accurate, clear, and safe by testing if they follow instructions, are correct, have engaging writing styles, and provide harmless responses

? Test Your Knowledge! Check tf3

Which of the following are potential components of a task? Select all that apply!

Re-writing Responses

Writing Responses

Rating Responses

Single or Multi Turn

Correct!

@ Correct! Typically you will be Writing Prompts, Writing Responses, Rating Responses, Re-writing Responses, and may encounter Single vs Multi-Turn tasks

Why are rubrics important to follow & where can you find them? Select all that apply!

Rubrics are a guiding document found in the instructions that help guide you on how to rate a model

Rubrics are answer sheets to every task on the platform

Rubrics highlight the specific dimensions to rate a model on so that we may train & fine tune models for specific use cases. They may be found within the instructions.

Rubrics are a useful tool to figuring out how to cheat the AI model

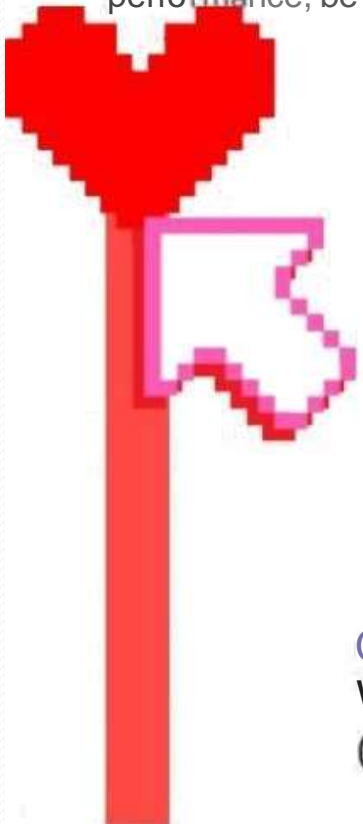

Correct!

- Correct! We can find rubrics in the instructions and they're used as the source of truth for how we can rate or write prompts & responses

Review Level Upgrades

Role upgrades are entirely merit based - you will usually start as an attempter on a project and based on your performance, be upgraded to reviewer

Contributor
Work on tasks
(hourly)

**Also synonymous with Attempter at this level*

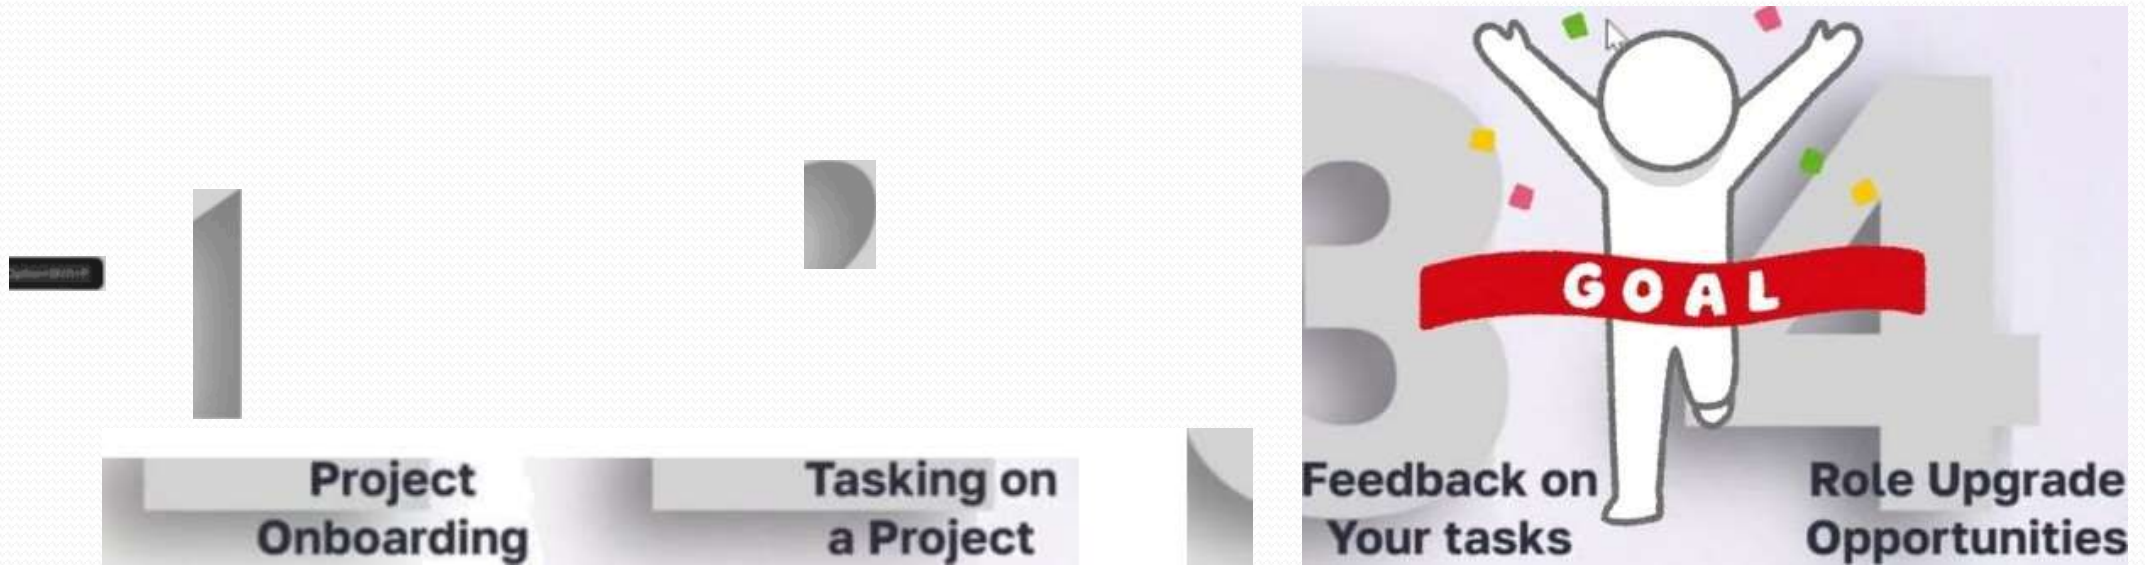

How does getting assigned to a project work?

VSAI7r@ning

Know 3'he Proiect

Once you complete this onboarding, you will be matched to a project based on your skillset & pay level. *Items can happen within 1 hour or may take up to two weeks, depending on project (ilaOillty)*

You will need to complete project onboarding in order to start working on a project.

This will apply to every new project you start.

Assessment tasks served before & throughout a project will determine whether or not you are still eligible to be on the project.

You will receive task-specific feedback to review.

The more high quality tasks you submit, the more likely we will staff you on a project.

Role upgrades are available on most projects.

Task Sample

Here's a query that selects "column1" and "column2" values if "conditions" is true (assuming that "conditions" is of type boolean) and "column3" values otherwise.

```
SELECT
  CASE WHEN conditions THEN column1 ELSE NULL END AS column1,
  CASE WHEN conditions THEN column2 ELSE NULL END AS column2,
  CASE WHEN NOT conditions THEN column3 ELSE NULL END AS column3
FROM your_table;
```

In this query, if "conditions" is true, it will return values for "column1" and "column2" and return NULL for "column3" values. If the condition is false, it will return values for "column3" and return NULL for "column1" and "column2" values.

You can add the condition in the "CASE" clause to filter your specific needs.

Whether the response reflects the quality of the prompt, not on correctness issues (e.g., bad grammar) – those are rated below

Minor Issues 0

Major Issues 0
